NOPPARIT SALASRI

Frontend Developer

094 251 2440

nopparit.dev@outlook.com

Bangkhae, Bangkok

SUMMARY

After gaining two years of experience in technical support alongside web administration and graphic design roles, I have decided to embark on a new challenge by transitioning into the role of a frontend developer. My strengths lie in effective communication, listening to customer problems, and providing thoughtful solutions; proficiency in creating infographics based on assigned designs; experience in website maintenance; and a strong enthusiasm for continuous learning and self-improvement. I am committed to leveraging all of my strengths and skills to collaborate effectively with design and backend teams to create outstanding and efficient work.

EDUCATION

Self-Learning

Web Development Bootcamp - Angela Yu Udemy

SQL Essential - Borntodev

HTML, CSS, JavaScript - Krongruksiam Youtube

Lopburi On Formal Education

High-school graduate 2018-2020

SKILLS

- HTML
- CSS
- JavaScript
- Python
- React
- Node.js
- Express.js
- jQuery
- Tailwind CSS
- PostgreSQL

TOOL

- VS Code
- Github
- Figma
- Adobe Illustrator
- Adobe Photoshop

PROJECT

IP Address Tracker

An IP address tracking website allows you to check and track the location based on the IP address or domain name. It provides detailed information about the IP address, such as country, region, internet service provider, and more.

- React
- Tailwind CSS
- Axios
- IP Geolocation API
- Leaflet.js

Off-Site Backup

This software has been developed to back up SQL and PostgreSQL databases. It will integrate with the Microsoft Graph API to synchronize backup files to users' OneDrive accounts. Additionally, it features a notification system via Line and email.

- Python
- Microsoft SQL
- PostgreSQL
- Microsoft Graph API
- Line API

EXPERIENCE

Technical Support

Arraybiz | 2022 - 2024

- Analysis, diagnosis, and resolution of technical issues occurring on the operating system or infrastructure systems that impact customers, resulting in the inability to use the software.
- Implementation of Windows Server system, Firewall, Active Directory, Microsoft Remote App, and database servers (SQL, MySQL, PostgreSQL).
- Management of data updates on the company's existing website.
- Create customer publicity images according to received information and designated designs.
- Editing of training videos and interview clips for publication on various online platforms of the company.
